## EXPERIENCE

2024 March - 2025 March

### Software Engineer

eSupport technologies  
pvt ltd

Successfully contributed to the development and maintenance of responsive web applications, utilizing React, JavaScript, HTML, and CSS. Collaborated with cross-functional teams to implement user-friendly interfaces and optimize performance.

2023 October - 2024

### Frontend Developer internship

realpos IT company

Dynamic and detail-oriented Frontend Developer with hands-on experience in building responsive and interactive web applications. Proficient in modern frontend technologies including React, JavaScript, HTML, and CSS. Skilled in translating and developing UI/UX designs into high-quality code while optimizing performance and user experience.

## PROJECTS

Git link : <https://github.com/DilSenevirathna>

<https://dilsenevirathna.github.io/Learnmate/>

### Learnmate Online Learning Platform

Developed a comprehensive online learning platform using modern web technologies, enabling users to access educational content and resources efficiently. Implemented interactive features for course navigation and user engagement using React and backend integration with Node.js and SQL. Focused on creating a responsive and intuitive user experience while maintaining code quality and scalability."

<https://dilsenevirathna.github.io/E-Store/>

## E-Store - E-commerce Web Application

Designed and developed a dynamic e-commerce platform with a focus on responsive and interactive user experiences. Utilized React, JavaScript, HTML, and CSS for frontend development, ensuring smooth navigation and intuitive UI components. Implemented backend functionalities using Node.js and Express, with SQL for database management. Integrated essential e-commerce features, including product listings, shopping cart, and secure checkout. Enhanced performance through optimization techniques and ensured cross-browser compatibility.

<https://dilsenevirathna.github.io/Weather-App/>

## Weather App - Real-Time Weather Tracking Application

Developed a real-time weather tracking application using React, JavaScript, HTML, and CSS for an interactive and user-friendly frontend interface. Integrated weather APIs to fetch accurate and up-to-date weather data. Implemented mobile-responsive design to ensure seamless user experience across devices. Utilized Node.js and Express for backend integration and efficient API handling. Applied optimization techniques for high performance and cross-browser compatibility.

## UX/UI DESIGN SAMPLE

## SKILLS

- HTML
- CSS
- React
- Php
- UI/UX Design
- Node.js
- Java Script
- React native
- SQL
- Python
- XML
- Java
- expo

## TOOLS

- Visual Studio
- SQL workbench
- SQL Server Management Studio
- Android Studio
- Netbean IDE
- Figma
- wordpress
- Selenium IDE
- JMeter
- AuTomato
- Gmetrix testing tool
